

The After Shower Experience

# How to use Valiryo for your best possible body drying experience

### — Step 1 —

Turn on Valiryo 20 seconds before you start using it.

### — Step 2 —

Choose the configuration with lowest air speed and highest temperature.

### — Step 3 —

In the meantime, remove the largest water drops on your shoulders and chest with your bare hands before using Valiryo.

### — Step 4 —

Position yourself in front of Valiryo and approach the nearest air diffuser with your mouth (maintain a distance of about 2cm). You will feel a source of heat is created that will soon spread out over your entire body.

### — Step 5 —

Set the temperature and airspeed as you wish.

### — Step 6 —

Relax and enjoy the moment.

*After drying, you will not only feel deeply relaxed, but also notice a softer and more hydrated skin with each application. And what's more: With Valiryo, post-shower sweating will finally be a thing of the past. Congratulations on a safer as well as more hygienic, efficient and sustainable way of body drying!*
